## Executive Summary

**Review Purpose:** The purpose of the review was to evaluate selected patient care activities to determine whether the community based outpatient clinics (CBOCs) and primary care clinic (PCC) provide safe, consistent, and high-quality health care for our veterans. We conducted site visits during the week of November 4, 2013, at the following CBOCs which are under the oversight of the VA Montana Health Care System and Veterans Integrated Service Network 19:

- Cut Bank CBOC, Cut Bank, MT
- Miles City CBOC, Miles City, MT

**Review Results:** We conducted four focused reviews and had no findings for the Designated Women's Health Providers' Proficiency review. However, we made recommendations in the following three review areas:

Environment of Care. Ensure that:

- Access to the clinic and the restroom are compliant with the Americans with Disability Act.
- Hazardous materials inventory reviews occur twice within a 12-month period at the Cut Bank and Miles City CBOCs.
- Signage identifying the location of fire extinguishers and exits is installed at the Cut Bank CBOC.
- Information Technology (IT) server closets at the Cut Bank and Miles City CBOCs are maintained according to IT safety and security standards.
- Computer screens are secured to eliminate viewing of personally identifiable information at the Miles City CBOC.
- An AED is available at the Miles City CBOC.
- Parent facility documents Emergency Management Preparedness-specific training completed for the clinical providers at the Cut Bank and Miles City CBOCs.
- Parent facility's Emergency Management Committee evaluates the Cut Bank and Miles City CBOCs' emergency preparedness activities, participation in annual disaster exercises, and staff training/education relating to emergency preparedness requirements.

Alcohol Use Disorder. Ensure that CBOC/PCC:

- Staff consistently document diagnostic assessments for patients with a positive alcohol screen.
- Staff provide education and counseling regarding the National Institute on Alcohol Abuse and Alcoholism limits for patients with positive alcohol screen.
- Staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.
- Registered Nurse Care Managers receive motivational interviewing training within 12 months of appointment to Patient Aligned Care Teams.

Medication Management. Ensure that CBOC/PCC staff:

- Document medication reconciliation that includes the newly prescribed fluoroquinolone in the electronic health record.
- Provide medication counseling/education that includes fluoroquinolones.
- Document the evaluation of patient's level of understanding for medication education.

## Comments

The VISN and Facility Directors agreed with the CBOC and PCC review findings and recommendations and provided acceptable improvement plans. (See Appendixes C and D, pages 17–18, for the full text of the Directors' comments.) We consider recommendation 6 closed. We will follow up on the planned actions for the open recommendations until they are completed.

JOHN D. DAIGH, JR., M.D.  
Assistant Inspector General for  
Healthcare Inspections

## **Objectives, Scope, and Methodology**

### **Objectives**

The CBOC and PCC reviews are an element of the OIG's efforts to ensure that our Nation's veterans receive high-quality VA health care services. As such, the CBOC and PCC reviews are recurring evaluations of selected primary care operations that focus on patient care quality and the EOC. In general, our objectives are to:

- Determine whether the CBOCs are compliant with EOC requirements.
- Determine whether CBOCs/PCCs are compliant with VHA requirements in the care of patients with AUD.
- Determine compliance with requirements for the clinical oversight and patient education of fluoroquinolones for outpatients.
- Evaluate if processes are in place for DWHPs to maintain proficiency in WH.

### **Scope**

To evaluate for compliance with requirements related to patient care quality and the EOC, we conducted onsite inspections, reviewed clinical and administrative records, and discussed processes and validated findings with managers and employees. The review covered the following four activities:

- EOC
- AUD
- MM
- DWHP Proficiency

The scope of this review is limited to the established objectives. Issues and concerns that come to our attention that are outside the scope of this standardized inspection will be reviewed and referred accordingly.

### **Methodology**

The onsite EOC inspections were only conducted at randomly selected CBOCs that had not been previously inspected.<sup>a</sup> Details of the targeted study populations for the AUD, MM, and DWHP Proficiency focused reviews are noted in Table 1.

---

<sup>a</sup> Includes 93 CBOCs in operation before March 31, 2013.

**Table 1. CBOC and PCC Focused Reviews and Study Populations**

<b>Review Topic</b>	<b>Study Population</b>
AUD	All CBOC and PCC patients screened within the study period of July 1, 2012, through June 30, 2013, and who had a positive AUDIT-C score <sup>b</sup> and all providers and RN Care Managers assigned to PACT prior to October 1, 2012.
MM	All outpatients with an original prescription ordered for one of the three selected fluoroquinolones from July 1, 2012, through June 30, 2013.
DWHP Proficiencies	All WH PCPs designated as DWHPs as of October 1, 2012, and who remained as DWHPs until September 30, 2013.

In this report, we make recommendations for improvement. Recommendations pertain to issues that are significant enough to be monitored by the OIG until corrective actions are implemented.

The review was done in accordance with OIG standard operating procedures for CBOC and PCC reviews.

<sup>b</sup> The AUDIT-C is a brief alcohol screen that reliably identifies patients who are hazardous drinkers or have active alcohol use disorders. Scores range from 0-12.

## Results and Recommendations

### EOC

The purpose of this review was to evaluate whether CBOC managers have established and maintained a safe and clean EOC as required.<sup>1</sup>

We reviewed relevant documents and conducted physical inspections of the Cut Bank and Miles City CBOCs. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

**Table 2. EOC**

NM	Areas Reviewed	Findings
	The CBOC's location is clearly identifiable from the street as a VA CBOC.	
	The CBOC has interior signage available that clearly identifies the route to and location of the clinic entrance.	
X	The CBOC is ADA accessible.	<p>The handicapped accessible restroom door hardware at the Cut Bank CBOC was difficult to grasp with one hand and required tight grasping, pinching, or twisting of the wrist to operate.</p> <p>The handicapped accessible door accessed via the ramp from the Cut Bank CBOC parking lot into the lobby was difficult to grasp with one hand and required tight grasping, pinching, or twisting of the wrist to operate.</p>
	The furnishings are clean and in good repair.	
	The CBOC is clean.	
X	The CBOC maintains an inventory of hazardous materials and waste that it uses, stores, or generates.	The CBOC's inventory of hazardous materials at the Cut Bank and Miles City CBOCs was reviewed for accuracy annually rather than twice within the prior 12 months.
	An alarm system and/or panic buttons are installed in high-risk areas (e.g., MH clinic).	
	Alcohol hand wash or soap dispenser and sink are available in the examination rooms.	
	Sharps containers are secured.	

NM	Areas Reviewed	Findings
	Safety needle devices are available.	
	The CBOC has a separate storage room for storing medical (infectious) waste.	
	The CBOC conducts fire drills at least every 12 months.	
	Means of egress from the building are unobstructed.	
	Access to fire alarm pull stations is unobstructed.	
	Access to fire extinguishers is unobstructed.	
X	The CBOC has signs identifying the locations of fire extinguishers.	There were no signs identifying the location of one fire extinguisher at the Cut Bank CBOC.
X	Exit signs are visible from any direction.	There were no exit signs identifying one means of egress at the Cut Bank CBOC.
	No expired medications were noted during the onsite visit.	
	All medications are secured from unauthorized access.	
	PII is protected on laboratory specimens during transport so that patient privacy is maintained.	
	Adequate privacy is provided to patients in examination rooms.	
	Documents containing patient-identifiable information are not laying around, visible, or unsecured.	
	Window coverings provide privacy.	
	The CBOC has a designated examination room for women veterans.	
	Adequate privacy is provided to women veterans in the examination room.	
X	The IT network room/server closet is locked.	Access to the IT network room/server closet at the Cut Bank and Miles City CBOCs was not documented.
X	All computer screens are locked when not in use.	All computer screens at the Miles City CBOC were not locked when not in use.
	Staff use privacy screens on monitors to prevent unauthorized viewing in high-traffic areas.	
	EOC rounds are conducted semi-annually (at least twice in a 12-month period).	

NM	Areas Reviewed	Findings
X	The CBOC has an AED.	The Miles City CBOC did not have an AED. We found a code cart which is not in compliance with local emergency policy.
	Safety inspections are performed on CBOC medical equipment in accordance with VA and Joint Commission standards.	
X	The parent facility includes the CBOC in required education, training, planning, and participation leading up to the annual disaster exercise.	The parent facility did not document EMP-specific training for Cut Bank and Miles City CBOCs' clinical providers.
X	The parent facility's Emergency Management Committee evaluates CBOC emergency preparedness activities, participation in annual disaster exercise, and staff training/education relating to emergency preparedness requirements.	The parent facility's EMC did not evaluate the Cut Bank and Miles City CBOCs' emergency preparedness activities, participation in annual disaster exercise, and staff training/education relating to emergency preparedness requirements.

1. We recommended that the side entrance door is ADA accessible at the Cut Bank CBOC.
2. We recommended that the restroom is ADA accessible at the Cut Bank CBOC.
3. We recommended that processes are improved to ensure review of the hazardous materials inventory occurs twice within a 12-month period for the Cut Bank and Miles City CBOCs.
4. We recommended that signage is installed at the Cut Bank CBOC to clearly identify the location of fire extinguishers.
5. We recommended that signage is installed at the Cut Bank CBOC to clearly identify exits.
6. We recommended that the IT server closets at the Cut Bank and Miles City CBOCs are maintained according to IT safety and security standards.
7. We recommended that computer screens are secured to eliminate viewing of PII by unauthorized individuals at the Miles City CBOC.
8. We recommended that managers ensure that an AED is available at the Miles City CBOC.
9. We recommended that the parent facility document EMP-specific training completed for the Cut Bank and Miles City CBOCs' clinical providers.
10. We recommended that the parent facility's EMC evaluate the Cut Bank and Miles City CBOCs' emergency preparedness activities, participation in annual disaster exercises, and staff training/education relating to emergency preparedness requirements.

## AUD

The purpose of this review was to determine whether the facility's CBOCs and PCCs complied with selected alcohol use screening and treatment requirements.<sup>2</sup>

We reviewed relevant documents. We also reviewed 35 EHRs and validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

**Table 3. AUD**

NM	Areas Reviewed	Findings
	Alcohol use screenings are completed during new patient encounters, and at least annually.	
X	Diagnostic assessments are completed for patients with a positive alcohol screen.	Staff did not complete diagnostic assessments for 11 (31 percent) of 35 patients who had positive alcohol use screens.
X	Education and counseling about drinking levels and adverse consequences of heavy drinking are provided for patients with positive alcohol screens and drinking levels above NIAAA guidelines.	Staff did not provide education and counseling for 2 of 18 patients who had positive alcohol use screens and drinking levels above NIAAA guidelines.
X	Documentation reflects the offer of further treatment for patients diagnosed with alcohol dependence.	We did not find documentation of the offer of further treatment for 3 of 9 patients diagnosed with alcohol dependence.
	For patients with AUD who decline referral to specialty care, CBOC/PCC staff monitored them and their alcohol use.	
	Counseling, education, and brief treatments for AUD are provided within 2 weeks of positive screening.	
X	CBOC/PCC RN Care Managers have received MI training within 12 months of appointment to PACT.	We found that 5 of 27 RN Care Managers did not receive MI training within 12 months of appointment to PACT.
	CBOC/PCC RN Care Managers have received National Center for Health Promotion and Disease Prevention approved health coaching training (most likely TEACH for Success) within 12 months of appointment to PACT.	
	The facility complied with any additional elements required by VHA or local policy.	

- 11.** We recommended that CBOC/PCC staff consistently complete follow-up assessments for patients with a positive alcohol screen.
- 12.** We recommended that CBOC/PCC staff provide education and counseling for patients with a positive alcohol screen and drinking levels above NIAAA limits.
- 13.** We recommended that CBOC/PCC staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.
- 14.** We recommended that CBOC/PCC RN Care Managers receive MI training within 12 months of appointment to PACT.

**MM**

The purpose of this review was to determine whether appropriate clinical oversight and education were provided to outpatients prescribed oral fluoroquinolone antibiotics.<sup>3</sup>

We reviewed relevant documents. We also reviewed 38 EHRs and validated findings with key managers and staff. The table below shows the areas reviewed for this topic. The areas marked as NM did not meet applicable requirements and needed improvement.

**Table 4. Fluoroquinolones**

<b>NM</b>	<b>Areas Reviewed</b>	<b>Findings</b>
X	Clinicians documented the medication reconciliation process that included the fluoroquinolone.	We did not find documentation that medication reconciliation included the newly prescribed fluoroquinolone in 25 (66 percent) of 38 patients' EHRs.
	Written information on the patient's prescribed medications was provided at the end of the outpatient encounter.	
X	Medication counseling/education for the fluoroquinolone was documented in the patients' EHRs.	We did not find documentation of medication counseling that included the fluoroquinolone in 33 (87 percent) of 38 patients' EHRs.
X	Clinicians documented the evaluation of each patient's level of understanding for the education provided.	Clinicians did not document the level of understanding for 3 of 5 patients.
	The facility complied with local policy.	

15. We recommended that CBOC/PCC staff document medication reconciliation that includes the newly prescribed fluoroquinolones in the EHR.
16. We recommended that CBOC/PCC staff provide and document medication counseling/education that includes the fluoroquinolone.
17. We recommended that CBOC/PCC staff document the evaluation of patient's level of understanding for the medication education.

## DWHP Proficiency

The purpose of this review was to determine whether the facility's CBOCs and PCC complied with selected DWHP proficiency requirements.<sup>4</sup>

We reviewed the facility self-assessment, VHA and local policies, primary care management module data, and supporting documentation for DWHPs' proficiencies. The table below shows the areas reviewed for this topic; NM denotes criterion "not met." The facility generally met requirements. We made no recommendations.

**Table 5. DWHP Proficiency**

<b>NM</b>	<b>Areas Reviewed</b>	<b>Findings</b>
	CBOC and PCC DWHPs maintained proficiency requirements.	
	CBOC and PCC DWHPs were designated with the WH indicator in the Primary Care Management Model.	

## CBOC Profiles

This review evaluates the quality of care provided to veterans at all of the CBOCs under the parent facility's oversight.<sup>c</sup> The table below provides information relative to each of the CBOCs.

Location	State	Station #	Locality <sup>e</sup>	CBOC Size <sup>f</sup>	Uniques <sup>d</sup>				Encounters <sup>d</sup>			
					MH <sup>g</sup>	PC <sup>h</sup>	Other <sup>i</sup>	All	MH <sup>g</sup>	PC <sup>h</sup>	Other <sup>i</sup>	All
Billings	MT	436GH	Urban	Large	1,491	5,706	8,773	9,530	9,926	18,111	53,387	81,424

Glasgow	MT	436GI	Highly Rural	Small	35	415	246	457	111	1,390	432	1,933

<sup>c</sup> Includes all CBOCs in operation before March 31, 2013.

<sup>d</sup> Unique patients and Total Encounters – Source: MedSAS outpatient files; completed outpatient appointments indicated by a valid stop code during the July 1, 2012, through June 30, 2013, timeframe at the specified CBOC.

<sup>e</sup> [http://vaww.pssg.med.va.gov/PSSG/DVDC/FY2013\\_Q1\\_VAST.xlsx](http://vaww.pssg.med.va.gov/PSSG/DVDC/FY2013_Q1_VAST.xlsx)

<sup>f</sup> Based on the number of unique patients seen as defined by VHA Handbook 1160.01, *Uniform Mental Health Services in VA Medical Centers and Clinics*, September 11, 2008, the size of the CBOC facility is categorized as very large (> 10,000), large (5,000-10,000), mid-size (1,500-5,000), or small (< 1,500).

<sup>g</sup> Mental Health includes stop codes in the 500 series, excluding 531 and 563, in the primary position.

<sup>h</sup> Primary Care includes the stop code list in the primary position: 323 – Primary Care; 322 – Women's Clinic; 348 – Primary Care Group; 350 – Geriatric Primary Care; 531 – MH Primary Care Team-Individual; 563 – MH Primary care Team-Group; 170 – Home Based Primary Care (HBPC) Physician.

<sup>i</sup> All other non-Primary Care and non-MH stop codes in the primary position.

## CBOC Services Provided

In addition to primary care integrated with WH and MH care, the CBOCs provide various specialty care, ancillary, and tele-health services. The following table lists the services provided at each CBOC.<sup>j</sup>

<b>CBOC</b>	<b>Specialty Care Services<sup>k</sup></b>	<b>Ancillary Services<sup>l</sup></b>	<b>Tele-Health Services<sup>m</sup></b>

## PACT Compass Metrics

### FY 2013 Average 3rd Next Available in PC Clinics

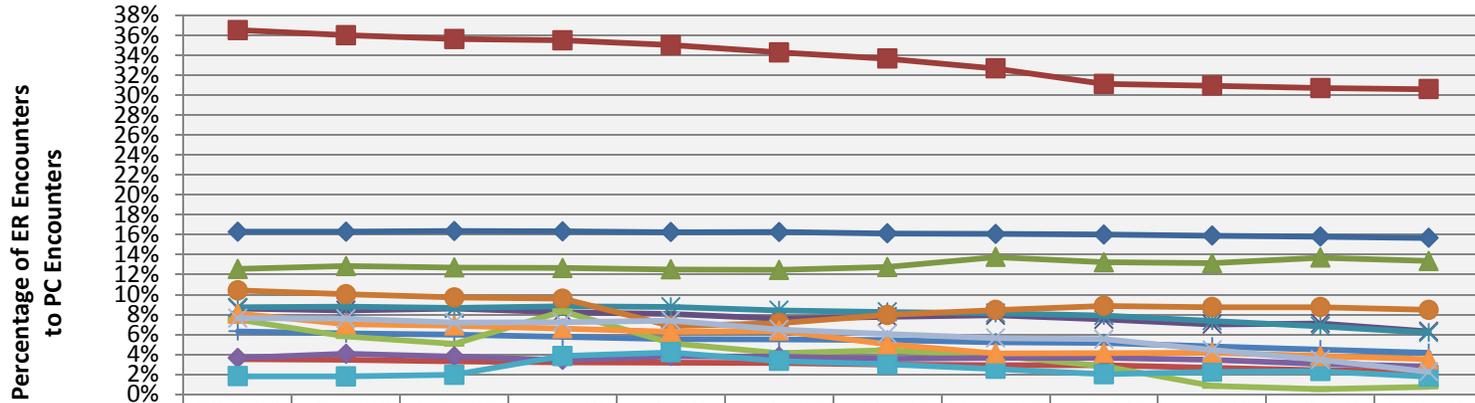

**Data Definition.**<sup>5</sup> The average waiting time in days until the next third open appointment slot for completed primary care appointments in stop code 350. 350. Completed appointments in stop code 350 for this metric include completed appointments where a 350 stop code is in the primary position on the appointment or one of the telephone stop codes is in the primary position, and 350 stop code is in the secondary position. The data is averaged from the national to the division level.

**Data Definition.**<sup>5</sup> The percent of patients scheduled within 7 days of the desired date. Data source is the Wait Times Prospective Wait Times measures. The total number of scheduled appointments for primary care-assigned patients in primary care clinics 322, 323 and 350. Data is collected twice a month on the 1st and the 15th. Data reported is for the data pulled on the 15th of the month. There is no FY to date score for this measure.

**Data Definition.**<sup>5</sup> Total Discharges Included in 2-day Contact Post Discharge Ratio: The total VHA and FEE Inpatient Discharges for assigned primary care patients for the reporting timeframe. Discharges resulting in death and discharges where a patient is readmitted within 2 days of discharge are excluded from this metric. Blank cells indicate the absence of reported data.

## VISN Director Comments

**Department of  
Veterans Affairs**

**Memorandum**

**Date:** January 13, 2014

**From:** Director, VISN 19 (10N19)

**Subject:** **CBOC and PCC Reviews of the VA Montana Health Care System, Fort Harrison, MT**

**To:** Director, Seattle Office of Healthcare Inspections (54SE)  
Director, Management Review Service (VHA 10AR MRS  
OIG CAP CBOC)

I have reviewed and concurred on the response from VA Montana Health Care System. If you have any further questions, please contact Ms. Susan Curtis, VISN 19 HSS at (303) 639-6995.

Ralph T. Gigliotti, FACHE

## Facility Director Comments

**Department of  
Veterans Affairs**

**Memorandum**

**Date:** January 13, 2014  
**From:** Director, VA Montana Health Care System (436/00)  
**Subject:** **CBOC and PCC Reviews of the VA Montana Health Care System, Fort Harrison, MT**  
**To:** Director, Rocky Mountain Health Care Network (VISN19)

1. The VA Montana Health Care System has reviewed and concurs with the findings included in the draft Community Based Outpatient Clinic and Primary Care Clinic Report. A response is provided along with target dates of completion for each recommendation.
2. If you have questions or need additional information, please contact Vicki Thennis Chief Quality Management Officer at 406-447-7863 or [vicki.thennis@va.gov](mailto:vicki.thennis@va.gov).

Christine Gregory, FACHE

Director, VA Montana Health Care System (436/00)

## Comments to OIG's Report

The following Director's comments are submitted in response to the recommendations in the OIG report:

### **OIG Recommendations**

**Recommendation 1.** We recommended that the side entrance door is ADA accessible at the Cut Bank CBOC.

Concur

Target date for completion: 4/1/2014

Facility response: VA Montana Health Care System (VAMTHCS) will ensure ADA compliant automatic door opener is properly functioning. We will also ensure door hardware is ADA compliant.

**Recommendation 2.** We recommended that the restroom is ADA accessible at the Cut Bank CBOC.

Concur

Target date for completion: 4/1/2014

Facility response: VAMTHCS will ensure door hardware is ADA compliant.

**Recommendation 3.** We recommended that processes are improved to ensure review of the hazardous materials inventory occurs twice within a 12-month period for the Cut Bank and Miles City CBOCs.

Concur

Target date for completion: 9/30/2014

Facility response: VAMTHCS will develop and implement a program ensuring a review of the hazardous materials inventory occurs twice within a 12 month period.

**Recommendation 4.** We recommended that signage is installed at the Cut Bank CBOC to clearly identify the location of fire extinguishers.

Concur

Target date for completion: 4/1/2014

Facility response: The fire extinguisher in question will be moved to the lobby and a sign will be posted indicating fire extinguisher.

**Recommendation 5.** We recommended that signage is installed at the Cut Bank CBOC to clearly identify exits.

Concur

Target date for completion: 6/1/2014

Facility response: VAMTHCS will install “Not an Exit” sign on the door that leads to the outside of the clinic through the back. Staff at the Cut Bank CBOC will be educated and trained that this door is not an exit and in case of emergency patients and staff are to exit from the building through the front exit door.

**Recommendation 6.** We recommended that the IT server closets at the Cut Bank and Miles City CBOCs are maintained according to IT safety and security standards.

Concur

Target date for completion: Completed

Facility response: Access logs have been placed in the IT closets at the Cut Bank and Miles City CBOCs. Local staff have been given instruction related to VA Handbook 6500, Appendix D in regards to the requirement for visitors to log in when visiting the IT spaces.

**Recommendation 7.** We recommended that computer screens are secured to eliminate viewing of PII by unauthorized individuals at the Miles City CBOC.

Concur

Target date for completion: 9/30/2014

Facility response: The Privacy Officer participated in EOC rounds to the Cut Bank CBOC on November 13, 2013 and the Miles City CBOC on December 12, 2013. Staff at both CBOCs were provided instruction on the need for keeping computer screens secured to eliminate viewing of PII by unauthorized individuals. Monitoring of this activity will occur during the monthly CBOC inspections by CBOC leaders for the next 4 months and during scheduled team EOC rounds by the Privacy Officer (or designees) during the remainder of FY 2014.

**Recommendation 8.** We recommended that managers ensure that an AED is available at the Miles City CBOC.

Concur

Target date for completion: 6/1/2014

Facility response: An order for an AED has been placed and it will be put into service in the Miles City CBOC upon arrival. The Nurse Manager has been designated the point of contact for ensuring placement, training and monitoring of this device.

**Recommendation 9.** We recommended that the parent facility document EMP-specific training completed for the Cut Bank and Miles City CBOCs' clinical providers.

Concur

Target date for completion: 6/1/2014

Facility response: The Emergency Preparedness Coordinator will ensure clinical providers at VAMTHCS CBOCs complete the required Emergency Management training module(s) and will include documentation of that training in the Emergency Management Committee minutes at least annually.

**Recommendation 10.** We recommended that the parent facility's EMC evaluate the Cut Bank and Miles City CBOCs' emergency preparedness activities, participation in annual disaster exercises, and staff training/education relating to emergency preparedness requirements.

Concur

Target date for completion: 6/1/2014

Facility response: The Emergency Preparedness Coordinator will ensure disaster exercise plans, scenarios, and critiques are included in the regular Emergency Management Committee minutes. Committee members will be asked to review and approve of these elements and to help ensure staff training and education, in order to fully comply with this recommendation.

**Recommendation 11.** We recommended that CBOC/PCC staff consistently complete follow-up assessments for patients with a positive alcohol screen.

Concur

Target date for completion: 7/1/2014

Facility response: The National Clinical reminder for alcohol use was reviewed and is in place in the electronic medical record for use. The Associate Chief of Staff Ambulatory Care will provide instruction to all CBOC providers to consistently complete follow-up assessments for patients with a positive alcohol screen utilizing the entire national clinical reminder for follow-up to a positive AUDIT C screen. The nurse managers for Ambulatory Care will conduct an audit of patient records with a positive AUDIT C screen for 90 days to monitor compliance.

**Recommendation 12.** We recommended that CBOC/PCC staff provide education and counseling for patients with positive alcohol screen and drinking levels above NIAAA limits.

Concur

Target date for completion: 7/1/2014

Facility response: The facility CAC will modify the dialog in the National Clinical reminder to prompt the clinical staff to provide education and counseling for patient with positive alcohol screens and drinking levels above NIAAA limits. A template is being developed to assist in documentation of the education provided to the patient. The Associate Chief of Staff for Ambulatory Care will provide instruction to all CBOC providers to convey the education and counseling as appropriate for patients with positive alcohol screens and to document the counseling utilizing the template. The nurse managers for Ambulatory Care will conduct an audit of patient records with a positive AUDIT C screen for 90 days to monitor compliance.

**Recommendation 13.** We recommended that CBOC/PCC staff consistently document the offer of further treatment to patients diagnosed with alcohol dependence.

Concur

Target date for completion: 7/1/2014

Facility response: The facility CAC will modify the dialog in the National Clinical reminder to prompt the clinical staff to offer a referral for further treatment to patients diagnosed with alcohol dependence. A template is being developed to assist in documentation of the referral offer and education provided to the patient. The Associate Chief of Staff for Ambulatory Care will provide instruction to all CBOC providers to offer a referral for further treatment and counseling as appropriate for patients diagnosed with alcohol dependence and to document utilizing the template. The nurse managers for Ambulatory Care will conduct an audit of patient records with a positive AUDIT C screen for 90 days to monitor compliance.

**Recommendation 14.** We recommended that CBOC/PCC RN Care Managers receive MI training within 12 months of appointment to PACT.

Concur

Target date for completion: 4/1/2014

Facility response: As of date there have been multiple training opportunities offered and the Education Service has worked with managers to make sure targeted staff attend the trainings. Those that were on the list of not receiving MI training have already completed or are on a schedule to complete the training. Going forward, the Education Service will work with Ambulatory Care managers quarterly to identify staff needing the mandatory training and schedule it appropriately.

**Recommendation 15.** We recommended that CBOC/PCC staff document medication reconciliation that includes the newly prescribed fluoroquinolones in the EHR.

Concur

Target date for completion: 7/1/2014

Facility response: The Pharmacy Service Chief will place fluoroquinolones in a special ordering category that gives prompts for additional requirements, such as medication reconciliation, when ordering these medications. The Associate Chief of Staff for Ambulatory Care will provide instruction to all CBOC providers to complete medication reconciliation when ordering Fluoroquinolones and document it using the Med Rec Outpatient note. The Quality Department will audit a sampling of EHRs for 90 days to monitor compliance and will report the results to the P&T committee.

**Recommendation 16.** We recommended that CBOC/PCC staff provide and document medication counseling/education that includes the fluoroquinolone.

Concur

Target date for completion: 7/1/2014

Facility response: The Associate Chief of Staff for Ambulatory Care will instruct providers to include patient education specific to Fluoroquinolones when ordering the medication and to document that education in the EHR. The medication reconciliation template will include the education provided to the patient regarding Fluoroquinolone use. The Quality Department will audit a sampling of EHRs for 90 days to monitor compliance and will report the results to the P&T committee.

**Recommendation 17.** We recommended that CBOC/PCC staff document the evaluation of patient's level of understanding for the medication education.

Concur

Target date for completion: 7/1/2014

Facility response: The Associate Chief of Staff for Ambulatory Care will instruct providers to include patient education specific to Fluoroquinolones when ordering the medication and to document that education including the patient's response to the education in the EHR. The medication reconciliation template will include the education provided and the patient's response to the education regarding Fluoroquinolone use. The Quality Department will audit a sampling of EHRs for 90 days to monitor compliance and will report the results to the P&T committee.
